WATER DAMAGE?

Restore Its flood, water, sewage, and mold damage restoration experts have the equipment and experience necessary to handle the most challenging situations.

SINCE 1980...

We are your local, family-owned cleaning and water damage restoration specialist. Our crews are professionally trained to handle any size job—large or small.

WATER DAMAGE
24 HOUR EMERGENCY SERVICE
www.restoreitall.com

We put safety first.

Water may cause damage to the foundations, short circuits in the electrical system and carry biological hazards. **Restore It's** flood, water, sewage, fire and mold damage restoration experts have the equipment and experience necessary to handle the most challenging situations.

THE TICKING CLOCK, THE IMPORTANCE OF QUICK DRYING:

Water damage is like a clock, once started, time quickly elapses. The longer the restoration efforts take to remediate the water damage condition, the greater the potential loss.

RESTORE IT USES:

Water extraction: Truck mounted machine to quickly and thoroughly extract water even down to the sub-floor in preparation for the final drying process.

Air Movers: Designed for high flow air, directed where it is needed, under flooring, into wall cavities and under carpets.

Air Scrubbers: A portable, high-speed recirculating fan equipped with a series of filters, including a HEPA filter.

Dehumidifiers: Residential brands will remove 10 to 50 pints of water while **Restore It's** commercial units can remove up to 152 pints per 24 hour period.

INSURANCE SPECIALISTS IN WATER DAMAGE RESTORATION
